## Professional Summary

Details-oriented creative technologist with a strong desire to bring my passion for design and visual communication to companies that share the same values.
I craft intuitive, visually compelling digital products from zero to one design systems to consumer interfaces. My background in robotics / aerospace engineering sharpens my approach to complex systems while hands-on work with Figma, AI suite keeps me close to implementation. Eager to take on new challenges in Europe, Asia.

## Design Skills & Tools

**Visual / Graphic:** Brand identity, Static ads, layout, motion concepts
**Tools & Platforms:** Figma, Sketch, Adobe Suite, Rive, AI platforms (Higgsfield, Midjourney, Krea),Xcode, Git
**Design systems:** Components librairies, multiplatforms guidelines, user flows, wireframing, hi-fi prototyping
**Other:** Flora, Blender, Weavy, CAD models

## Professional Experience

**Marlink – Product Designer & iOS Developer**

Toulouse, France | Sept 2023 – Present
• Redesigned an interactive satellite terminal dashboard for 200K+ users to solve 'status anxiety' caused by jarring data updates; architected fluid, motion-driven micro-interactions that 'morphed' between system states to provide subconscious user confirmation.
• Acted as a key liaison between development teams and clients, ensuring alignment on technical requirements, project timelines, and deliverables.
• Built and maintained a 500+ component multi-platform design system from scratch, ensuring visual and technical parity between Figma prototypes and Swift/SwiftUI implementation.
• Deployed an iOS app reaching 200K+ users.
• Applied Agile methodologies and CI/CD automation via Jenkins & GitLab.

**Collins Aerospace – iOS Developer**

Toulouse, France | Sept 2024 – Sept 2025
• Develop and maintain iOS apps for major airlines, ensuring performance and App Store compliance.
• Collaborate with designers and product teams to improve UX and integrate new features.
• Contributed to design QA, catching visual regressions and interaction inconsistencies before release.
• Use GitLab CI/CD, Jira, and Agile methods for efficient delivery cycles.

**Safran Seats – Aerospace Engineer & Digital Coordinator**

Paris, France | Sept 2020 – Aug 2022
• Coordinated teams on Airbus programs, ensuring timely and compliant delivery.
• Supported digital innovation and process automation initiatives by leading the integration of Autonomous Mobile Robots (AMRs) within production lines.
• Improved collaboration between engineering, marketing, and management.

## Education & Certifications

**JUNIA – Graduate School of Engineering (France)**

Master's in Robotics & Aeronautics (2020–2022). Focus: robotics, industrial robotics, predictive maintenance, avionics.

**42 School – Programming Academy** (2022)
C/C++ programming, software architecture, peer learning.

**Stanford University – CS193p** (2022)
Advanced iOS development with SwiftUI, MVVM, REST APIs.

## Soft Skills & Interests

Autonomous, adaptable, and solutions-oriented. Strong communication in cross-functional teams. Competitive tennis player (rank 3/6). Passionate about brand design, static ads, and AI workflows.
